-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3751

1. The drawings are objected to because reference character "38b" (lower right) in Fig. 3 apparently should be --38d-- (pg. 6 ln. 21). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described

Art Unit: 3751

in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 1 recites "rotating nozzle assemblies rigidly connected to the interior of said basin". Implementation of this subject matter is neither taught by the instant disclosure nor evident to the examiner. The illustration in Fig. 6 does not teach one how to make a rotating nozzle and rigidly connect it to a basin wall. No additional disclosure was found concerning this subject matter.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3751

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Matsunaga et al.

The Matsunaga et al. (Matsunaga) reference discloses a hair washing device comprising: a basin 13; a plurality of rotating nozzle assemblies 23,25 including three nozzles 24,26; a hood 14 including a face cover 15; and temperature controls 19, as claimed.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsunaga and Shimizu.

Although the cover of the Matsunaga hair washing device does not include an elastic inner edge, as claimed, attention is directed to the Shimizu reference which discloses an analogous hair washing device which further includes a cover A having an elastic inner edge 1b. Therefore, in consideration of Shimizu, it would have been obvious to one of ordinary skill in the hair washing device art to associate an elastic inner edge with the Matsunaga cover in order to prevent water escape.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

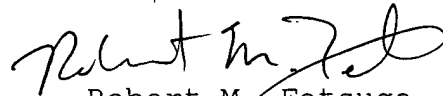

Art Unit: 3751

The Little reference discloses a device having features in common with the instant invention.

6. The non-English language prior art reference(s) cited in the information disclosure statement(s) filed November 18, 2003, has(have) been considered to the extent understood from the attendant drawings and abstract.

7. Applicant is referred to MPEP 714.02 and 608.01(o) in responding to this Office action.

8. Any inquiry concerning this communication should be directed to Robert M. Fetsuga at telephone number 571/272-4886 who can be most easily reached Monday through Thursday.
